Starr Textiles: New Orleans, LA

PROJECT DESCRIPTION

Client: Starr Laundry
Project: HVAC Upgrade
Floor Area: 32,000 sf
General Contractor: ARCO-Murray
Construction Schedule: Four months

PROJECT APPROACH

Design/Build

ROLE

Engineer of Record
Mechanical Construction Manager

PROJECT SCOPE

Starr Textile Services provides commercial laundry services, dry cleaning, garment processing and textile rental services to clients along the Gulf Coast in Louisiana, Mississippi, Alabama and Florida.

Wiegmann furnished and installed process exhaust and intake for industrial laundry equipment at Starr Textiles' 32,000-square-foot facility in New Orleans. We also provided spot cooling solutions at specific locations throughout the facility. Construction challenges included working in the older warehouse with a poorly insulated standing seam metal roof.
