

Watlow: Maryland Heights, MO

[Home / Watlow: Maryland Heights, MO](#)

PROJECT DESCRIPTION

Client: Watlow

Project: Advanced Technology Center (ATC)

General Contractor: BSI Constructors

Construction Schedule: 20 months (Dec, 2014 – Aug, 2016)

PROJECT APPROACH

Plan/Spec

ROLE

Installing HVAC Contractor

PROJECT SCOPE

Watlow designs and manufactures industrial heaters, temperature sensors, controllers and supporting software for a variety of thermal applications. The Advanced Technology Center project in Maryland Heights, Missouri, added 30,000 square feet of new construction and renovated 56,000 square feet.

As the installing HVAC contractor, Wiegmann furnished and installed all HVAC equipment and the compressed air system. The complexity of the replaced systems as well as the density of the warehouse and production spaces were primary project challenges, which our team addressed through stringent organization, scheduling and communications.
