

Liberty High School: Lake Saint Louis, MO

[Home](#) / / Liberty High School: Lake Saint Louis, MO

PROJECT DESCRIPTION

Client: Wentzville School District

Project: New Construction of Liberty High School

General Contractor: Brinkmann Constructors

Floor Area: 220,000-square-feet

Construction Schedule: 16 months

PROJECT APPROACH

Value Engineering, Plan/Spec

ROLE

Installing HVAC Contractor

PROJECT CHALLENGE/SOLUTION

high school in the Wentzville School District was to furnish and install the HVAC system. The primary challenges were the size of the 220,000-square-foot facility and the strict schedule. To simplify construction and speed up the schedule, our team Value Engineered some areas of the design. We worked closely with McClure Engineering, the Engineer of Record, to ensure that all changes resulting from the VE concepts retained the original design intent.
