

## Performance Food Group: Phoenix, AZ

Home / Performance Food Group: Phoenix, AZ

### PROJECT DESCRIPTION

**Client:** Performance Food Group

**Project:** Conditioned Warehouse HVAC Renovation

**General Contractor:** ARCO National Construction Company, Inc.

**Floor Area:** 10,200 sf refrigerated space, 9,800 sf conditioned warehouse

**Construction Schedule:** Three months

### PROJECT APPROACH

Design/Build

### ROLE

Engineer of Record

Mechanical Construction Manager

### PROJECT SCOPE

Performance Food Group is a distributor specializing in broadline distribution, customized distribution, and processing/delivering of fresh-cut produce throughout the United States. The Phoenix location is one of 68 distribution centers nationwide.

The project was a renovation of the existing PFG warehouse. Wiegmann added a new HVAC system for the previously unconditioned warehouse and new refrigeration systems for the freezer and cooler spaces.

Working within an existing warehouse with a wood structure posed project challenges. Wiegmann designed units and duct drops to miss trusses that are 24 inches on center while maintaining clear height requirements for product storage and fork lifts.
