U.S Auto Force: Colorado Springs

[Home](#) / U.S Auto Force: Colorado Springs

PROJECT DESCRIPTION

Client: U.S. Ventures
Project: New Construction Warehouse and Offices
General Contractor: Brinkmann Constructors
Floor Area: 140,000 sf
Construction Schedule: February 2018

ROLE

Design/Build HVAC Mechanical Contractor

PROJECT APPROACH

Design/Build

PROJECT SCOPE

U.S. Auto Force is a nationwide distributor of tires, undercar parts, and lubricants to independent tire retailers, auto repair shops, and automotive dealerships. They serve their clients from 25 locations across the United States.

U.S. Auto Force wanted a cost-effective HVAC system with zoned temperature control for their new warehouse and offices in Colorado Springs, CO. Wiegmann Associates – Denver designed a reliable, cost effective HVAC system to serve the warehouse, offices and also the forklift charging and battery exhaust systems. Wiegmann also installed a five-zone control system to provide enhanced and remote temperature control for various areas of the offices.
