

Charles F. Prevedel Federal Building: St. Louis, MO

Home / Charles F. Prevedel Federal Building: St. Louis, MO

PROJECT DESCRIPTION

Client: U.S. General Services Agency (GSA)

Project: HVAC Renovation

General Contractor: Tarlton Corporation

Floor Area: 200,000 sf

Construction Schedule: Spring 2015 – Fall 2016

PROJECT APPROACH

Design/Build

ROLE

Installing HVAC Contractor

ENERGY SAVINGS

The new HVAC system provides new utility metering, automation and monitoring to reduce energy usage and meet high performance green building standards.

PROJECT SCOPE

Wiegmann replaced an obsolete HVAC system. HVAC upgrades included the relocation and replacement of outdoor air intakes on the roof to meet current security requirements.

The \$27.1 million renovation of the five-story federal building in Overland, MO, converted 200,000sf of formerly vacant space into offices for the Veterans Benefits Administration (VBA).
